Description

- inlet adapter for closing the charged air system
- for passenger car and commercial vehicle turbo engines, diesel and petrol
- allows rapid diagnosis by pressure testing the charged air system with hose internal diameters 31.0 - 110.0 mm when fitted
- time-saving and professional testing of leaking charged air cooler and hidden cracks in the charged air hoses
- also for checking the tightness of the AGR valve
- suitable for all current hoses on the charged air system that are not fitted with a bayonet connector using the multi-stage offset adapter
- in the event of pressure loss, the leak can be quickly and simply localised by scanning the part or using leak spray
- can be used together with compatible counter stopper adapters and air inlet system adapters and in combination with a conventional tyre inflator
