

Turbo system pressure tester kit with bayonet adaptor, 13 pcs

Article No.: 150.1825
 EAN: 4042146623381
 RRP: €462.23 *

Description

- for charged passenger car engines, diesel and petrol
- allows rapid diagnosis by pressure testing the charged air system with bayonet connector diameters 31.0 - 61.0 mm
- time-saving and professional testing of leaking charged air cooler and hidden cracks in the charged air hoses
- also for checking the tightness of the AGR valve
- suitable for all current hoses on the charged air system that are fitted with a bayonet connector
- in the event of pressure loss, the leak can be quickly and simply localised by scanning the part or using leak spray
- with integrated overpressure safety valve - opens at max. 1.8 bar
- can be used in conjunction with conventional tyre inflators
- the pressure gauge on the tyre inflator also indicates pressure loss
- in durable plastic storage case

Application range / for:
 Charged air systems for passenger cars

Properties

Packaging contents: 1
Packaging height, mm: 118
Packaging length, mm: 472
Packaging width, mm: 366
Parts in the set: 13
Weight [g]: 2560

Consists of
