Description

- for the assembly and disassembly of bearings
- ideally for silent bearings, hydro bearings, bushings, ball bearings, simmer rings etc.
- universal use for construction machines, truck, municipally, country and forestry technology etc.
- outstanding to use also in connection with workshop press or hollow piston cylinder
- according to use application the sheaths individually can be reworked
- pressure bearing protects against increased friction during the process
- in durable plastic storage case
- supplement set for 700.1700 / 700.1735

Attention: the spindles need to be greased with a good lubricant for each application! Do not overload spindles, otherwise the thread lengthens and the pitch of the nut and spindle no longer match. The result: the nuts will seize up. Always check the applied force at the drive with a torque wrench!
