

**Advent, Advent: every day a tool**

- The KS Tools Advents calendar with lots of useful extras
- Twice the fun for 24 days

Advents calendars are as much a part of the German Advent season as gingerbread and candles. An Advents calendar with a really good tool is especially great fun for workshop professionals. And KS Tools offers one. The tool specialist from Heusenstamm in Germany has created a calendar which will make a mechanics heart leap. Every day a tool: That's like 24 days of Christmas in a row. The Advents calendar is available under the product number 999.7777, of course only while stocks last.

**Surprise with a great tool set**

The saying at KS Tools goes "If you want to please a professional mechanic, you can't overlook this charming surprise particularly at Christmas. A regular Advents calendar is fun for almost four weeks. The fun lasts much longer with an Advents calendar with tools. Namely every day it is used." This limited edition contains a complete quarter inch socket spanner set with a total of 48 pieces. So whoever opens the little door in the morning has twice the fun.

The Advents calendar contains impact sockets of 4 to 13mm, various hexagonal bits as well as Torx, PZ and PH nuts. We have also included the right extensions, a universal joint and of course a 72-tooth ratchet. And finally a nicely designed storage box ensures secure and easy storage of the treasures collected over 24 days.

**Illumination included**

KS Tools has included an almost Christmassy detail to the socket spanner set: a useful Brilliant Tools LED pen lamp compliments the set and provides the brightest possible illumination in the workshop during the dark time of the year. Its 40 lumen at the front and 140 lumen at the side provide lots of illumination. It is switchable for perfect illumination. So the professional mechanic can choose to illuminate to the front or to the side.

The Advents calendar is especially suitable for workshop bosses who at the end of the year want to please their committed employees. But of course parts dealers can also take advantage and say thank you to their customers in December with the Advents calendar. You can order now.
